

INSYSTED WEBINARS

Interested in making the most of MOOCs, serious games and online learning communities in your teaching? Take part in the INSYSTED webinars!

The **INSYSTED project** (INtegrated SYStem for European Digital learning) devised an **instructional booklet** with practical advice on how to foster soft and digital skills and internationalisation in higher education by using **MOOCs**, **serious games** and **forum-based learning communities**.

The INSYSTED webinars are for university teachers and staff interested in implementing this approach, with a special focus on industrial and management engineering education.

The **third webinar** "Introducing the serious game: learning objectives and key functionalities" will be offered at the beginning of 2022. More info on the **webinars page** of the project website.

The events will be presented on November, 4th in a talk at the **University Future Festival 2021**.
